TECHTAIK Wednesday, 28 December 2022 / 9:00 am CLT Egypt / Technical Analysis Daily Report

- The continuation of CIB [COMI] to move below its resistance level of 43.00 increases the chances for the index to move within a narrow range of 14,800-14,000 in the near term.
- We still believe that any decline in the index and its constituents (i.e. a correction wave) will be considered as an opportunity to build long positions for medium-term traders.

• The continuation of the index to rebound is positive and increases the chances for starting a new bullish wave, which will be confirmed after penetrating the resistance level of 2,815.
