

EGX 30 Index

EGX 70 EW Index

- Although the index continued to move above its support level of 16,500, which indicates the continuation of the short-term bullish trend, its inability to cross the 17,400 barrier warns of an imminent change in the trend.
- We advise *not* to open long positions.
- During yesterday's trading, the index moved towards its major resistance level of 3,070.
- The positive performance of the index constituents may push it to penetrate the abovementioned resistance level.
